

EMC Documentum ReportXtender

Distribution and delivery for EMC Documentum ApplicationXtender

The Big Picture

- Allows for the distribution of content to individuals and organizations who need access to the information—especially when Web access is not possible, convenient, or appropriate
- Provides a self-contained, cost-effective content-viewing solution with easy-to-use search and retrieval of content on CD-ROM media
- Ensures that content can be retrieved on any Windows-based computer with CD-ROM drive

Organizations need to provide information to their customers, partners, or other third parties. In some cases, providing access via a Web connection may not be convenient, such as for subcontractors at a construction job site or distribution of technical manuals to customers. In other cases, the external organization will need to bring information into its own system for further use. Finally, the end user may need to have a snapshot of the information at a particular moment in time, so access to live (possibly changing) data would be inappropriate.

Complete document distribution system

EMC Documentum[®] ReportXtender provides a complete content distribution mechanism for ApplicationXtender, allowing organizations to distribute content via CD to third parties who may or may not have ApplicationXtender. ReportXtender meets the organizational and inter-organizational demand for the distribution of content to those individuals who need access to the information—especially when Web access is not possible, convenient, or appropriate.

In addition, ReportXtender facilitates information sharing between organizations by providing an optional mechanism to migrate content between instances of ApplicationXtender. By facilitating fast and secure information sharing between organizations, ReportXtender further extends the business value of an organization's information.

Simple, intuitive extraction wizard

- Ability to define criteria for ApplicationXtender content to be included on storage media
- Collects content in "staging area" for transfer to CD-ROM media
- Searchable index for content included on storage media
- Index and images can be placed on single CD-ROM media or span multiple media
- Operates independently of CD authoring hardware and software

Content viewing

- Read-only viewing utility provides easy-to-use search and retrieval of content on CD-ROM media based on keywords
- Ensures that content can be retrieved on any Windows-based computer with CD-ROM drive
- Alternatively, allows users to view content of CD-ROM media using ApplicationXtender client

Migrate content from media to ApplicationXtender

- Provides reintegration wizard for migrating content from a ReportXtender-created CD-ROM to ApplicationXtender
- Allows for sharing of content between different instances of ApplicationXtender, which facilitates data transfer and sharing between business partners, suppliers, vendors, and other third parties
- Content can be used and managed directly in any new instance of ApplicationXtender, as though it were generated natively

Flexible licensing

- Purchase only the number of CDs you expect to create—expand later as needed
- Adding to the CD count is a simple, electronic process—no need to wait for shipping of new software or hardware
- Flexibility to implement a self-contained, cost-effective content-viewing solution

About Documentum software from EMC

Documentum software from EMC Corporation includes enterprise content management solutions that enable organizations to unite teams, content, and associated business processes. With a single platform, EMC Documentum software enables people to collaboratively create, manage, deliver, and archive the content that drives business operations, from documents and discussions to e-mail, Web pages, records, and rich media. The Documentum enterprise content management platform makes it possible for companies to distribute all of this content in multiple languages, across internal and external systems, applications, and user communities. As a result of deploying Documentum, thousands of the world's most successful organizations are harnessing corporate knowledge, accelerating time to market, increasing customer satisfaction, enhancing supply chain efficiencies, reducing operating costs, and improving their overall competitive advantage.
